Achieve More with 1Staff Analytics Powered by Microsoft

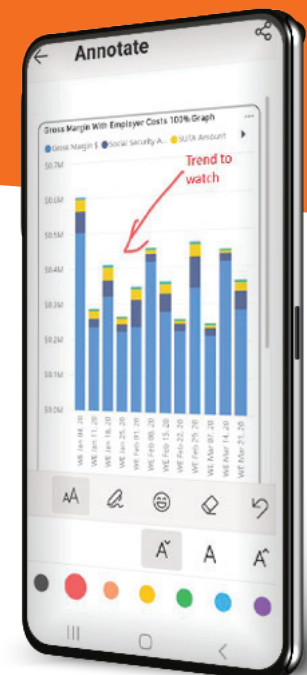

Elevate your insights with advanced data analytics

Empowering Your Staffing Success with 1Staff.

Professional Advantage's leading enterprise staffing and recruitment solution 1Staff and our knowledge of the staffing industry helps your business achieve more from your Business Analytics and AI strategy.

We will integrate your operational, Back Office and Financial data and analysis perspectives and give you a performance, insights to drive your growth and acquisition strategies.

We will cut your cost of business, simplify your data management, streamline your technical and application stacks, and impress your people.

“We’re just so thankful that Power BI connects to 1Staff seamlessly, it’s all in one spot and it’s just proving its weight in gold, it’s just such an open architecture that we can basically do anything we want with the data. It’s been very, very helpful from that standpoint, and being more dynamic with our information.”

What is 1Staff Analytics?

1Staff Analytics exposes vital business insights to help your managers pinpoint opportunities and challenges, compare performance and identify trends.

1Staff Analytics:

- Rationalizes your staffing performance data such as margin and full burden analysis at the key dimensions of your business, for example; Company, SBU, Office, Salesperson, Customer, Job, Contract, Recruiter.
- Provides top level views, and the ability to slice, dice, and aggregate at every level, down to the transaction.
- Automatically accumulates data as your business transacts. That's analytics from day 1! It provides an immediate store of data for a business to query, discover, and report from.
- Includes out of the box logic for revenue and cost prediction, debt and aging performance.
- Makes it easy for your business users to consume and use data in business terms. It supports easy analysis in common and familiar tools such as Microsoft Excel, for slice and dice and analysis, and Microsoft Report Services to generate and distribute structured reports cost effectively to the enterprise.
- Systematically and reliably delivers your commission reporting, providing accurate and timely reports to drive and incentivize your business.
- Scales to support data across your enterprise systems from Front Office to external pay systems.

1Staff Analytics Essentials.

Staffing metrics

1Staff Analytics with Power BI.

Microsoft Power BI

Power BI is the world leading business analytics service by Microsoft. It provides interactive visualizations and business intelligence capabilities with an interface simple enough for businesspeople to create their own reports and dashboards.

Power BI can be easily embedded in your Front and Back Office applications for team and activity level visualization. Microsoft's leading Intelligent Business Applications Platform includes AI and Machine Learning that will turn your data into eye popping insights beautifully presented.

Power BI is also part of the broader Microsoft Azure Cloud Platform including advanced analytics, Open AI and Machine Learning capabilities.

Key Insights for your CIO and CTO

1Staff Analytics is deployed on Azure, Microsoft cloud platform that offers powerful solutions for analytics, machine learning and AI. Here are some of the benefits of using Azure for these purposes:

Azure Synapse Analytics is a unified service that combines data integration, data warehousing, big data analytics and AI. It allows you to easily access and analyze all your data from various sources, including structured, semi-structured and unstructured data.

Azure Synapse Analytics integrates with Azure OpenAI, a suite of natural language processing models that can generate, summarize and translate text. You can use Azure OpenAI to enrich your data with natural language insights and create intelligent applications.

Azure Synapse Analytics also integrates with Azure Machine Learning, a service that enables you to build, train and deploy machine learning models. You can use Azure Machine Learning to apply predictive analytics, anomaly detection, forecasting and more to your data.

Azure Synapse Analytics supports private connectivity and Azure RBAC, which means you can secure your data and control access to your resources. It also offers scalability, performance and reliability for your analytics workloads.
