

Successfully migrate your Business Applications to the Cloud

Increase the agility and flexibility of your business by migrating your mission-critical business applications to the Microsoft Azure cloud platform. Microsoft Dynamics GP can become a lot easier to manage when running it in the Cloud. Leverage the power of the Microsoft Azure Cloud so you can quickly scale when needed, enhance your systems, and application security and data protection.

Make the smart move. Migrate your business applications to Microsoft Azure cloud today!

What can you expect?

With your ERP software hosted in Azure, here are some of the benefits that you can expect to realize in your business:

Predictable monthly operating expenditure on Azure subscription.

Pay only for what you use on your monthly Azure subscription with no hidden charges.

Get up and running in the Azure Cloud in no time.

Without the need to purchase, set up, or configure additional On-Premise servers, storage, and networking hardware, deploying your ERP into the Azure Cloud can be done in a fraction of the traditional time (weeks, sometimes even days).

Meet your business' growing demands on your IT and ERP systems with scalable capacity supply.

Microsoft Azure scales with your business, whether you need to increase data storage or add more users, allowing you to provision resources quickly with minimal disruption.

Get the support that you need, when you need it.

We will manage your Azure environment for you using advanced monitoring tools with self-healing capability, overseen by our team of support engineers.

Improved Identity, Data, and Systems security and protection.

Microsoft Azure is compliant to many industry-specific regulatory, security, and compliance requirements, ensuring a secured and trusted cloud infrastructure platform for customers to host their business-critical applications.

“The Professional Advantage team is solutions-orientated. They try to find ways to help us to get the implementation to occur despite a lot of time-frame challenges. They were truly effective, knowledgeable, and have helped us with staying on top of the implementation.

They have a good understanding of the sensitivity of moving environments and data and have made the transition relatively seamless for our end-users.”

Kevin Garvey, Director at Allied Health Australia

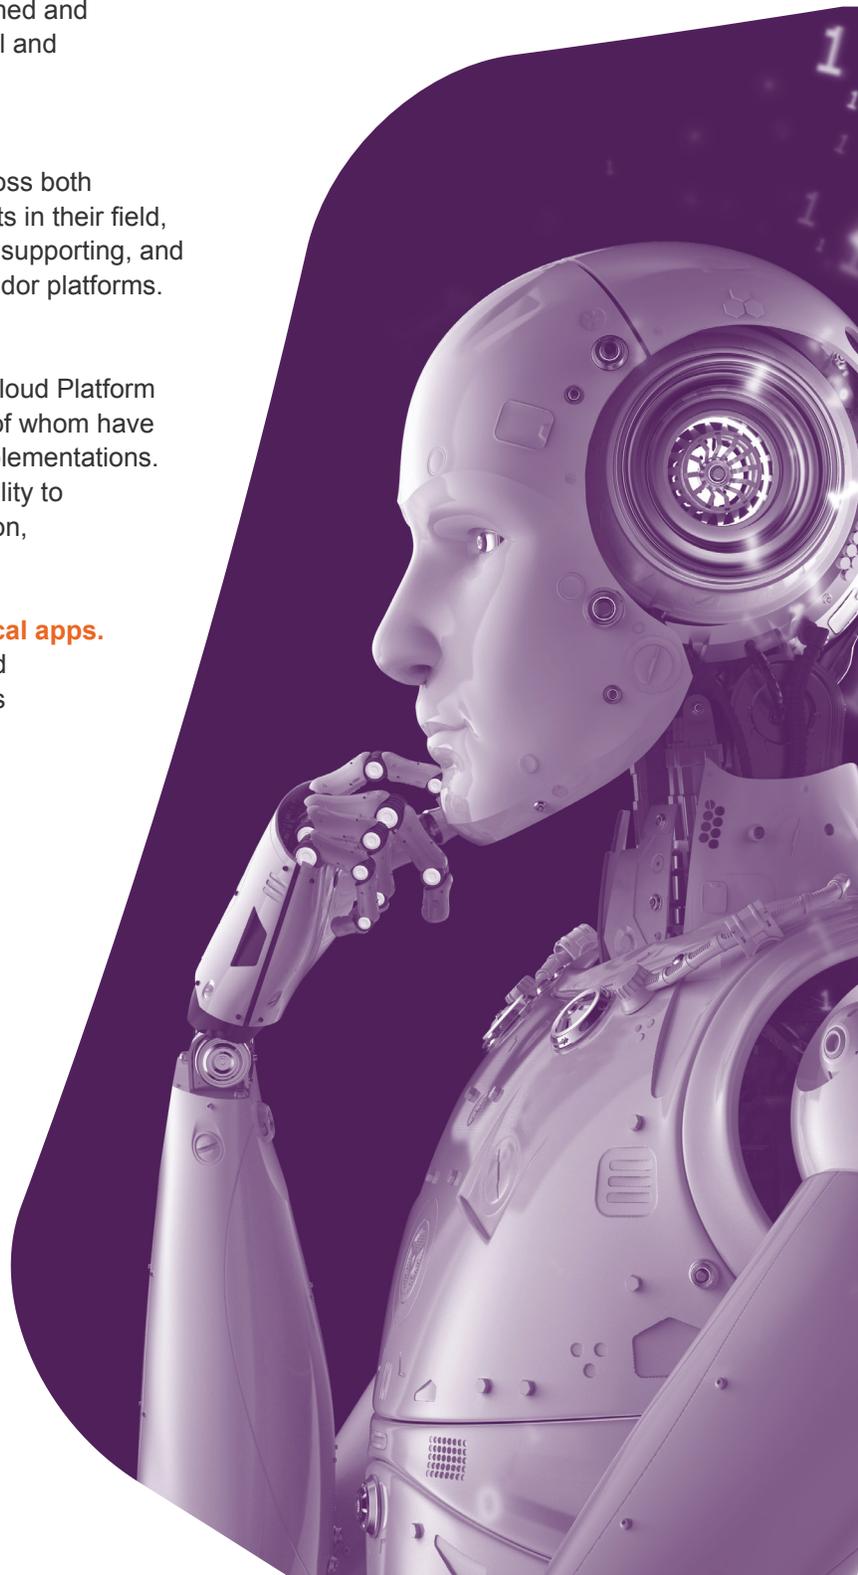

The Professional Advantage Difference

We ensure impressive business outcomes in every single project we deliver because we have:

- **Established and proven cloud solution delivery framework.**
Our project delivery methodology follows established and proven project frameworks that minimize technical and commercial project risk.
- **Certified and experienced consultants.**
We have technical and functional consultants across both Microsoft Dynamics GP and Azure who are experts in their field, with years of hands-on experience implementing, supporting, and developing solutions for our clients with these vendor platforms.
- **Excellent track record in the industry.**
We are a recognized Microsoft Gold Partner for Cloud Platform (Azure), with a growing portfolio of clients, many of whom have entrusted us to deliver multiple Azure solution implementations. Our referenceable clients are testament to our ability to deliver impactful, quality projects in a timely fashion, and within agreed budget.
- **Proactive remote monitoring of business-critical apps.**
We have a dedicated Azure certified helpdesk and support team in addition to experienced engineers who can proactively monitor the health of your applications to ensure they will continue to run smoothly and optimally within the Azure cloud environment.

Ready to discover more?

If you would like to get started with hosting your ERP software in the Microsoft Azure cloud, reach out to us. We can provide you with a free, no-obligation assessment to assist with your understanding of possible migration and implementation options as well as budgetary estimates of your projected Azure cloud usage charges.
